U. S. GEOLOGICAL SURVEY
FARMINGTON, N. M.

(NOTE: Report results of multiple completion or zone change on Form 9-330.)

3-24-82 Stung into retainer at 6490'. Attempted to squeeze cement but could not pump inot perforations at 4000 psi. Pulled tubing. Set Howco cement retainer at 6404'. Retain tubing. Tested well for water production.

Since the well still produced excessive amounts of water, it is intended to string into retainer at 6404' and squeeze cement off lower perforations with 50 sks. cement. Upper zone will then be tested for water production.
