13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Merrion requests approval to extend the production test for this well an additional 6 months until May 1, 1995. Initial results indicate the well is marginally economic, producing 30" mcf/d. We are in the process of laying a gas sales line to this well and anticipate gas sales to commence within the next month.

At the end of the six month period we will either ask the BLM to rescind our plugging plan or will go ahead and plug the well.
