13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The daily history of the completion operations and deviation survey information performed on the subject well is attached.

The present completion in the Basin Dakota Sand is non-commercial. There is recompletion potential in the wellbore, however, a recompletion at this time is uneconomical due to lack of a nearby low pressure pipeline system.

Therefore, we request permission to temporarily abandon this wellbore with a cast iron bridge plug in the 4-1/2" casing @ $\pm 6050'$. (Perforations from 6100'-6140')
