RE: Division Order No. R-9340

Dear Mr. Corbett:

Thank you for your letter dated October 25, 1991 notifying us of the difference in the actual surface location of the Debra Geiger Well No. 1 from the location approved by Division Order No. R-9340, dated November 1, 1990.

Under the circumstances and since the actual location is less unorthodox than the authorized location, such change has been duly noted and recorded as being 101' FSL and 173' FEL (Unit P) of Section 32, Township 25 North, Range 11 West, NMPM, San Juan County, New Mexico.

Please take note in the future when requesting an unorthodox surface location as to its "drillability" prior to filing such request.

Sincerely,

MICHAEL E. STOGNER
Chief Hearing Officer/Engineer

REFERENCE: Debra Geiger Well No. 1
Surface Location

Dear Mr. Stogner:

Giant Exploration & Production Company wishes to advise you of the actual surface location of the referenced well. That location is:

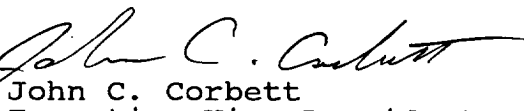

101' FSL and 173' FEL
Section 32, T25N, R11W
San Juan County, New Mexico

You will note that this location differs slightly from those footages detailed in Case No. 10110, Order No. R-9340 dated November 1, 1990. Topographic constraints on the north side of the location and wilderness area restrictions on the south necessitated moving the location in order to position the drilling rig and still maintain a common well pad for this well and the Devon Nielsen Well No. 1.

If you should have any questions regarding this, please do not hesitate to call.

Sincerely,

GIANT EXPLORATION & PRODUCTION COMPANY

John C. Corbett
Executive Vice President
