(NOTE: Report results of multiple completion or zone change on Form 9-330.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Recently the subject well developed a casing leak and became non-producible. It is proposed to set a 5 1/2" cement retainer on tubing above the perforations to isolate them from the casing leak.

After the retainer is set, the subject well will be evaluated for 90 days. If production returns and the economics are favorable then the well will be permanently repaired. This work should begin approximately June 20, 1982.

It will fail to return to a producible status then it will be P.I.A. after 90 day evaluation period.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____ Ft.

18. I hereby certify that the foregoing ~~is true and correct~~
