GEOLOGICAL SURVEY

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

To prevent Gallup drainage from offset Gallup wells it is intended to complete the Gallup formation in this well and down-hole comingle the Gallup Dakota zones in the following manner:

Move on location and rig up. Pull tubing.

Set bridge plug above top of the Dakota perforations.

Perforate and sand gel condensate frac the Gallup interval from 7665' to 7689'

Re-run tubing and comingle the Dakota and Gallup formations.

NOTE: Production will be allocated as per Order No. from the NMOCC: R-6142.

Subsurface Safety Valve: Manu. and Type _____ Set @ _____

18. I hereby certify that the foregoing is true and correct
