17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

It is proposed to repair a casing failure in this well by pulling the tubing now set in a cement retainer in the well. The failure would then be isolated with a packer and squeeze cemented with a sufficient amount of cement to repair the failure. The casing would then be pressure tested to 1300 psi, cleaned out and the tubing reran.
