13. Describe Proposed or Completed Operations. Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.*

The Rincon Unit Well No. 35 was successfully abandoned in the Pictured Cliffs formation and an attempt was made to recomplete in the Fruitland Coal. The gas production was too small to measure and the well was shut-in for buildup.

It is proposed to set a bridge plug at \pm 2800 (above the Fruitland coal perfs), pressure test the casing to 600 psi for 30 minutes, and circulate the hole with packer fluid to temporarily abandon the well pending further evaluation of completion techniques in the Fruitland Coal.
