LOG OF OIL OR GAS WELL

Company **Ralph A. Johnston** Address **Box 813, Farmington, New Mexico**
Lessor or Tract **Rincon Unit** Field **So. Blanco Pic- State New Mexico**
Well No. **18** Sec. **35** T. **27N** R. **7W** Meridian **NMPM** County **Rio Arriba**
Location **1650 ft. [X] of N. Line and 1650 ft. [E] of W. Line of Section 35** Elevation **6697 (GG)**
(Derrick floor relative to sea level)
The information given herewith is a complete and correct record of the well and all work done thereon
so far as can be determined from all available records:
Signed **James W. [Signature]** Title **Superintendent**
Date **March 15, 1954**

The summary on this page is for the condition of the well at above date.

Commenced drilling **October 10**, 1953 Finished drilling **November 21**, 1953

OIL OR GAS SANDS OR ZONES

(Denote gas by G)

FORMATION RECORD

FROM—	TO—	TOTAL FEET	FORMATION
0	3035	3035	Clay, sand, shale, shaley sand and coal.
3035	3115	75	Pictured Cliffs sand - top - 3035'.

FORMATION RECORD—Continued[illegible]

HISTORY OF OIL OR GAS WELL

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of re-drilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing.

A 13-3/4" rotary hole was drilled to 112 feet. Ran 104 feet of 9-5/8" 36# surface pipe and set same with 75 sacks of regular cement, then circulated out. Drilled cement down to shoe and pressured up surface casing to 500#. Held with no less in pressure for 30 minutes.

From below the surface shoe an 8-3/4" rotary hole was drilled to 3035 feet. The hole was reduced to 7-3/8" and further drilled to a total depth of 3115 feet. A Schlumberger ES log was run to total depth. Ran 7" 20# and 17# to 3035 feet. Cemented same with 150 sacks of regular cement. Cut off 7" and moved off rotary tools. Moved on cable tools. Drilled float and shoe. Bailed open hole clean. Dumped 490 quarts of SNG from 2045 feet to 3115 feet and shot tamped with Cal-Seal. Drilled out tamp and bailed hole down 900 feet and well unloaded. Cleaned out to 3115 feet. Checked this depth twice at 2-hour intervals with a bailer and no water could be recovered.

After checking for water shut-off a 1" Siphon line was run to 3100 feet. The christmas tree was placed on the 7" casing and well shut in to await testing and a pipeline connection. Cable tools were moved off. The well was tested on November 30, 1953, and has since remained shut in.
