DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Due to non-commercial production it is intended to plug this well in the following manner:

1. Pump water into casing to make sure well is dead and to make sure cement can be displaced from casing.
2. Pump 150 sacks regular cement, 6" gel down 7" casing followed by 7" top wiper plug, displace to top of liner.
3. Shoot off 7" casing at free point and spot 25 sack cement plug on 7" stub.
4. Pull 7" casing and spot 10 sack cement plug in to p of surface pipe and install 4' x 4" dry hole marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
