(Field)

Rio Arriba

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 7106 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Due to non-commercial production it is intended to plug and abandon this well in the following manner:

1. Pick up tubing and spot a 100 sack cement plug in 5" casing to cover perms. (5720-6164').
2. Shoot off 7" casing at free point and spot a 25 sack cement plug on 7" stub.
3. Pull 7" casing and spot a 10 sack cement plug in top of surface casing and install a 4' x 4" dry hole marker.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
