DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This is for the purpose of changing the name of this well from MY-12 to PM-12

We would like to change the prefix to denote the zones this well produces from.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
