Gentlemen:

According to our records, there appears to be a discrepancy on the September 1957 Proration Schedule for the San Juan Basin. EPNG Harvey State A No. 1 Well in A-32-27N-7W, South Blanco Pictured Cliffs Pool, should have a July net status of 8,812 MCF excess rather than 9,812 MCF as appeared on the schedule. Correspondingly, the August net allowable was 1,000 MCF too low.

If this is not a correct assumption, please advise us.

Yours very truly,

**D. H. Rainey
Proration Department**
