Re: Jicarilla "G" #7
Sec. 36, T-27N, R-3W
Blanco Field
Rio Arriba County, New Mexico

Gentlemen:

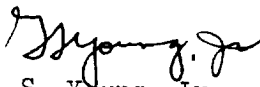

We propose to drill subject well to a projected depth of 6300'. It is further proposed to dually complete this well in the Pictured Cliffs and Mesa Verde zones.

We propose to set approximately 350' of 10-3/4" casing, approximately 4100' of 7-5/8" intermediate string, and set approximately 2300' of 5-1/2" liner on bottom. We will perforate in the Pictured Cliffs zone and the Mesa Verde zone and attempt a dual gas completion. Dual tubing strings will be run.

The subject well is located 990' FNL and 990' FEL of Sec. 36, T-27N, R-3W, Rio Arriba County, New Mexico.

Application for tentative approval to dually complete subject well is submitted in duplicate per direction of Mr. E. J. Fisher, District Engineer, New Mexico Oil Conservation Commission, Santa Fe, New Mexico, and in compliance with Rule 112-A-Revised.

Yours very truly,

G. S. Young, Jr.
District Superintendent
