Re: Jicarilla 95 #1, API# 30-039-06852, A-35-27N-03W, DHC

Dear Mr. Brink:

Your recommended allocation of commingled production for the referenced well is hereby accepted as follows:

	Gas	Oil
Pictured Cliffs	10%	0%
Mesaverde	90%	100%

Yours truly,

Ernie Busch
District Geologist/Deputy O&G Inspector

Gavilan Pictured Cliffs & Blanco Mesa Verde Pools
Administrative Order DHC-1071

Dear Mr. Bush:

We recently completed the field operations to **Add Pay** and downhole commingle the subject well. In accordance to DHC-1071, the supervisor of the Aztec District Office of the NMOCD shall determine the proper production allocation.

Prior to downhole commingling, the Pictured Cliffs was producing a stabilized rate of 24 MCFD. The Menefee sand and upper Pictured Cliffs was added to the wellbore. Subsequent testing showed the upper Pictured Cliffs sand to be wet and the perforations were squeezed off. The well has stabilized at a combined rate of 250 MCF/D and 1 BOPD. It is recommended the production allocation be as follows:

	Gas	Oil
Pictured Cliffs	10%	0%
Mesa Verde	90%	100%

If additional information is needed, please contact me.

Sincerely Yours;

Gary W. Brink
Production Superintendent
