DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended to change the surface casing program as follows:

Change from 280' to 120'. Thus, the cement will be changed to 100 sks regular, 1/4 cu. ft. Strata-Crete "6"/sk and 2 1/2 BA-5. This is 100% excess to circulate.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
