Re: Packer Leakage Test on the El Paso Natural Gas Company Well, San Juan 27-4 Unit 17 (P), 810S, 1150W; 29-27-4, Rio Arriba County, New Mex.  
(Name - Location - County)

Dear Mr. Arnold:

The subject well was finally completed in the Pictured Cliffs and Mesa Verde zones and a packer was set at 3888 feet. The Pictured Cliffs zone was tested through (MV - PC) 3/4" choke for three hours August 7, 1958 with the following data obtained:  
(Date)

|    |      |      |      |         |    |      |
|----|------|------|------|---------|----|------|
| 10 | PC   | 1018 | psig | shut-in | 21 | days |
| 10 | SIPT | 1018 | psig |         |    |      |
| 10 | SIPT | 1127 | psig | shut-in | 7  | days |

| Time<br>Minutes | (PC) Flowing Pressure<br>Casing psig | (MV) (T) psig | PC<br>Pressure, psig | Tbg.<br>Gauge |
|-----------------|--------------------------------------|---------------|----------------------|---------------|
| 15              | 311                                  | 1126          |                      | 64            |
| 30              | 250                                  | 1127          | 260                  | 60            |
| 45              | 205                                  | 1127          |                      | 62            |
| 60              | 191                                  | 1127          | 201                  | 62            |
| 120             | 154                                  | 1128          | 163                  | 63            |
| 180             | 136                                  | 1128          | 145                  | 64            |

The shut-in pressure for Pictured Cliffs was 1715 psig.  
1749 psig.

The results of the above tests indicate there is no packer leakage.
