If well is directionall drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well bore represents a legal Mesa Verde infill location. It is our intention to perforate and fracture stimulate the Mesa Verde and place into production. Once a stabilized rate is established we will commingle the Mesa Verde with the Pictured Cliff formation, which is currently producing from this well bore. We expect this work to commence on or about September 20, 1999.
