Well No. 2 is located 990 ft. from N line and 990 ft. from E line of sec. 25
Hearilla #9
27 N 3 W
(Twp.) (Range)
H. M. P. M.
(Meridian)
New Mexico
(State or Territory)

Extension of Blanco
(Field)

Rio Arriba
(County or Subdivision)

The elevation of the derrick floor above sea level is 7202 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill the above well to a total depth of approximately 6500' with Rotary Tools. We expect to test the following zones at the following approximate depth:

SAND
Mesa Verde

We expect to test any other zones that appear productive of oil or gas.
CASING PROGRAM: Approximately 300-350' of 8-5/8" casing w/approximately 390 sk. cement. Approximately 6500' of 5-1/2" casing w/190 sk cement & to be cemented on bottom. We propose to perforate productive zones in the Mesa Verde and fracture formation w/approximately 40,000 gals. water using 1/2 sand per gal. water at in; rate of not less than 40 bbls per minute.

I understand that this plan of work must receive approval in writing by the Geological Survey before operation.
