13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

In February 1994, Union Oil Company of California received approval to downhole commingle the Basin Dakota and Blanco Mesaverde formations in the Rincon Unit Well No. 108.

The intended work to commingle these formations was not performed on this well.

The current plan is for this well to remain a dually completed Dakota/Mesaverde producer.
