Completion or Recompletion Report and Log form.)

REPAIRING WELL

ALTERING CASING

ABANDONMENT*

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The tubing scab which was set on February 4, 1972 failed to stop the tubing leak. The scab was pulled, the packoffs were redressed, and the scab was reset at 2626' to 2638'.

A packer leakage test concluded on March 23, 1972 indicated that communication still exists between zones.

It is planned to move a rig on this well about March 29, 1972 to replace leaking tubing and/or packer seal assemblies.

18. I hereby certify that the foregoing is true and correct
