Dear Sir:

We propose to drill the subject well to a projected depth of 6300'. It is further proposed to dually complete this well in the Pictured Cliffs and Mesa Verde zones.

We further propose to set 10-3/4" surface casing, 7-5/8" intermediate casing at approximately 4100', and set a 5 1/2" liner on bottom. We will perforate in the Pictured Cliffs and in the Mesa Verde zones and attempt a dual gas completion. Dual tubing strings will be run.

The subject well is located 990' FSL and 990' FWL of Section 15, T-27N, R-3W of Rio Arriba County, New Mexico.

Yours very truly,

W. C. Dougherty
