T&A

(Note: Repon results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It has been proposed to temporarily abandon this well. From a regional Fruitland Coal study, Conoco, Inc has identified potential Fruitland Coal reserves that can be accessed from this well, but are marginally economic, therefore we cannot justify a completion at this time. A planned development program is in place to test/complete the Fruitland Coal in offset wells in the upcoming year. Based on the results of that program, Conoco will either pursue a re-completion in the Fruitland Coal or P&A this well by August 2000.

Procedure to T&A this well:

1. RC, Set a temp BP within 50' of Top perf
2. Pressure up on well to 500 PSI
3. RD, MO

14. I hereby certify that the foregoing is true and correct
