

January 10th, 1957

Mr. A. L. Porter, Jr., Secretary
New Mexico Oil Conservation Commission
Mabry Hall, Capitol Building
Santa Fe, New Mexico

Dear Mr. Porter:

Pacific Northwest Pipeline Corporation requests that the New Mexico Oil Conservation Commission grant them permission to dually complete the Indian P #1, under the provisions of Order #R-306, Rule No. 112-A.

Indian P #1 is located 1386' from the north line and 1236' from the east line, Section 16, Township 27N, Range 3W, Rio Arriba County, New Mexico. The attached plat shows the ownership in the area and the location of the well. The W/2 of Section 16, containing 329.9 acres, is dedicated to the drilling block in accordance with the Blanco Mesa-verde rules; and the NE/4 Section 16, containing 169.9 acres, is dedicated to the Pictured Cliffs drilling block, which is classified as a wildcat.

Attached for your information is a diagrammatic sketch of the proposed dual completion, with information concerning formations involved, perforations and location of packer and tubing equipment. We have also attached a Return Receipt of Registered Mail, notifying Magnolia Petroleum Corporation that the well has been dually completed.

The 3 hour Calculated Absolute Open Flow on the Mesaverde formation was 2101 MCF, and on the Pictured Cliffs formation was 63 MCF. The Packer Leakage Test was witnessed by Mr. Harry Arnold, and the necessary data concerning this test has been filed with the Commission.

If additional information is needed on this well before a final order approving the dual completion can be issued, please notify us.

Very truly yours,

T. A. Dugan

January 10th, 1937

Mr. A. L. Porter, Jr., Secretary
New Mexico Oil Conservation Commission
Mexican Hall, Capitol Building
Santa Fe, New Mexico

Dear Mr. Porter:

Pacific Northwest Pipeline Corporation requests that the New Mexico Oil Conservation Commission grant them permission to drill a complete the Indian P-1, under the provisions of Order 13-316, Rule No. 112-A.

Indian P-1 is located 1300' from the north line and 1330' from the east line, Section 16, Township 27N, Range 3W, El Arriba County, New Mexico. The attached plat shows the ownership in the area and the location of the well. The W/2 of Section 16, containing 320.9 acres, is dedicated to the drilling block in accordance with the Blanco Mesa-Verde rules; and the NE 1/4 Section 16, containing 160.9 acres, is dedicated to the Hatched Cliffs drilling block, which is classified as a wildcat.

Attached for your information is a diagrammatic sketch of the proposed dual completion, with information concerning formations involved, perforations and location of packer and tubing equipment. We have also attached a Return Receipt of Registered Mail, notifying Magnolia Petroleum Corporation that the well has been dually completed.

The 3 hour Calculated Absolute Open Flow on the Reservoir formation was 2101 MCF, and on the Hatched Cliffs formation was 63 MCF. The Packer Leakage Test was witnessed by Mr. Emory Arnold, and the necessary data concerning this test has been filed with the Commission.

If additional information is needed on this well before a final order approving the dual completion can be issued, please notify us.

Very truly yours,

T. A. Dugan
Assistant Division Manager
