That he is of lawful age and has full knowledge of the facts herein below set out.

That on Nov. 24, 1956, he personally supervised the setting of a Rubber Motal BOJ Packer in PACIFIC NORTHWEST PIPELINE CORPORATION

Rio Arriba County, New Mexico.

That said packer was set at a subsurface depth of 5652-43 feet, NED
said depth measurement having been furnished by Carl Matthews.

That the purpose of setting this packer was to effect a seal in the annular space between the two strings of pipe where the packer was set so as to prevent the commingling, within the well-bore, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer. That this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
