ADMINISTRATIVE ORDER DHC-1261

Unocal Oil & Gas Division
P.O. Box 850
Bloomfield, New Mexico 87413

Attention: Mr. Brett H. Liggett

*Rincon Unit Well No.203
Unit M, Section 27, Township 27 North, Range 7 West, NMPM,
Rio Arriba County, New Mexico.
Blanco Mesaverde (Prorated Gas -72319) and
Basin Dakota (Prorated Gas -71599) Pools*

Dear Mr. Liggett:

Reference is made to your recent application for an exception to Rule 303.A. of the Division Rules and Regulations to permit the subject well to commingle production from both pools in the wellbore.

It appearing that the subject well qualifies for approval for such exception pursuant to the provisions of Rule 303.C., and that reservoir damage or waste will not result from such downhole commingling, and correlative rights will not be violated thereby, you are hereby authorized to commingle the production as described above and any Division Order which authorized the dual completion and required separation of the two zones is hereby placed in abeyance.

The maximum amount of gas which may be produced daily from the well shall be determined by Division Rules and Regulations or by the gas allowable for each respective prorated pool as printed in the Division's San Juan Basin Gas Proration Schedule.

In accordance with the provisions of Rule 303.C., the supervisor of the Aztec District Office shall determine the proper allocation of production from the subject well following its completion.

FURTHER: The operator shall notify the Aztec District Office of the Division upon implementation of the commingling process.

Pursuant to Rule 303.H., the commingling authority granted by the order may be rescinded by the Division Director if, in his opinion, conservation is not being best served by such commingling.

Approved at Santa Fe, New Mexico on this 23rd day of May, 1996.
