7170' GL

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

It is intended to permanently repair the casing failure by pulling the tubing and packer, setting a bridge plug at 3900', and testing the casing to 1000 psi below 500'. The casing will be cut off at 500' and tied back together with a Bowen casing patch. The casing will be tested to 1000 psi, the bridge plug drilled, and the well returned to production.

Subsurface Safety Valve: Manu. and Type
