

NEW MEXICO OIL CONSERVATION BOARD, INC.
PACKER SETTING REPORT

I, John L. Zerbi, Oilfield and Drilling
Name of party making report
knowledge of the facts hereinabove set out do state
That I am employed by El Paso Natural Gas Company, the report of
Petroleum Engineer, dated July 22, 1977
I personally supervised the setting of a Baker Model "D" Packer
Name of type of packer
in El Paso Natural Gas Company, San Juan 27-4 Unit
Operator of well Field location
Well no. 125 located in the Tapacito-PC. Ext. Blanco M.V. Block
Rio Arriba county, state of New Mexico at a settable depth of
3975 feet, said depth measurements having been furnished me by
Wireline Measurements
That the purpose of setting this packer was to effect a permanent separation between
strings of pipe where the packer was set so as to prevent the circulation in the lower string well
of fluids produced from a stratum below the packer with fluids produced from a stratum above the
packer; that this packer was properly set and that it did, when set, properly and effectively seal
off the annular space between the two strings of pipe where the packer was set so as to prevent
prevented any movement of fluids across the packer.

John L. Zerbi
Petroleum Engineer
