Archeological Survey of Proposed Well.
Candada # 15 Conducted for Bolin
Oil Company

This survey was conducted on 14 October 1975 by R. B. Grove of New Mexico State University (Federal Antiquities Permit 75-NM-013). The entire area to be disturbed was visually inspected on foot. Nothing was found to indicate that the proposed construction will have either direct or indirect adverse effects on cultural resources.

The proposed well is to be located on a grass and sage covered flat in a small rincon as shown in Figures 1 & 2. The well will be 640 feet from the North line and 630 feet from the West line of Section 25, Township 26 North, Range 7 West on Bureau of Land Management land in Rio Arriba County, New Mexico. Access will be from an existing road about 500 feet to the North.
