NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

D-5-27N-5W

I, Joseph Awny, being of lawful age and having full
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by El Paso Natural Gas Company in the capacity of
Petroleum Engineer, that on October 27, 1980

I personally supervised the setting of a Seal Assembly in PBR
Make & type of packer
in El Paso Natural Gas Company, San Juan 27-5 Unit
Operator of well *Lease name* Blanco Mesa Verde
Well no. 53A located in the Tapacito Pictured Cliffs & field,

Rio Arriba county, state of New Mexico, at a subsurface depth of
3560 feet, said depth measurement having been furnished me by
Pipe Record;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Joseph A. Awny
(Signature)

Petroleum Engineer
