Re: San Juan 27-5 Unit #69M
I Section 7, T-27-N, R-5-W
30-039-23823

REVISED

Gentlemen:

Attached is a copy of the allocation for the commingling of the subject well for the Lewis pay add that was completed 7-26-01. DHC-223az was issued for this well.

Gas: Mesaverde 41%
Dakota 59%

Oil: Mesaverde 37%
Dakota 63%

These percentages were calculated using rate-time reserve estimate comparisons for each respective formation. Because the Lewis formation was the only formation added during operations, the oil allocation has stayed the same as it was prior to working over the well. Please let me know if you have any questions.

Sincerely,

A handwritten signature in cursive script, appearing to read "Peggy Cole".

Peggy Cole

Production Allocation Documentation

San Juan 27-5 Unit #69M

Production Allocation

Based on Remaining Reserves

Lewis Payadd July 2001

REVISED

GAS

	<u>RR</u>	<u>Allocation %</u>
Dakota	466.7	59%
All	<u>789.5</u>	
Mesaverde	322.7	41%

Condensate

Since only the Lewis was added, and the Lewis is not an oil-producing formation, the condensate allocation remains the same.
