

Mr. Duane Spencer
May 13, 1992
Page 2

In summary we are suggesting that it is probable by one to two years to enter into any formal gas monetization strategy. We believe that an option is already available to this project and we will have sufficient time to design either an injection system or a gas gathering system.

We therefore request that American Hunter be allowed to continue to test gas at the same level as the initial well as we are able to present you, in the near future, with a proposal that we will go forward with an extended, defined project.

Yours very truly,

AMERICAN HUNTER EXPLORATION LTD
