APPROVED BY \_\_\_\_\_ TITLE \_\_\_\_\_ DATE \_\_\_\_\_

Conditions of approval, if any:

In accordance with Division Order –NO. R-11363. 19.5.5.303 (C )-c, Pure Resources request permission to down hole commingle Otero Chacra formation and Basin Dakota in the following well.

Rincon Unit 135E  
790' FNL & 790' FWL  
Sec 29, T-27-N, R-6-W  
Rio Arriba Co. NM

Perforated Intervals        (Basin Dakota)-

(Otero Chacra)

Allocation of production will be at a later date using established production of the Dakota minus the total production of the commingled well.

The Commingling of the above zones will allow Pure to more efficiently produce the zones, via a plunger lift system.

Both zones are of common ownership and produce essentially dry gas. Therefore the formation fluids are compatible. Also no crossflows will occur between the commingled zones.

Also a copy of the respective 3160 will be sent to the BLM for notification.
