13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Rincon Unit Well No. 187E was originally permitted and drilled as a Basin Dakota/Largo Gallup well in August, 1994. The well was completed in the Dakota Formation in October, 1994, but due to the poor quality of the reservoir (indicated by logs) was not completed in the Gallup Formation.

Unocal proposes to perforate, stimulate and test the well in the Mesaverde interval and if productive, complete and commingle the well as a Dakota/Mesaverde producer.

Attached is a new well location & acreage dedication plat for Well 187E
