RE: Application for Non-Standard Location
San Juan 28-7 Unit Well #126M
Section 1, T-27-N, R-7-W
2050' FNL & 2050' FWL
Rio Arriba County, NM

RECEIVED
JAN 15 1999
OIL CON. DIV.
DIST. 3

Dear Mr. Stogner,

Conoco Inc plans to drill the above referenced well in 1999. The referenced location is an open, 160-acre Dakota site. In an effort to prevent economic waste and too effectively / efficiently develop the 28-7 Unit to its fullest potential Conoco selected this wellsite location to serve two purposes. The location will serve to accommodate both a primary 160 acre Dakota infill, and a "100 acre" Mesaverde infill withdrawal point (pursuant to an order to be issued out of Burlington's case CD -12069).

Topography, arch, and infrastructure also played a role in limiting our location selection. The ability to access both horizons in a single wellbore will reduce development costs and surface disturbance. Please note that the location is interior to the 28-7 unit, and does not encroach on any Unit boundaries thereby making Conoco the only offset operator. The downhole commingling application ((C-107A) will be filed concurrently to obtain permission to commingle the Blanco Mesaverde and Basin Dakota in this well.

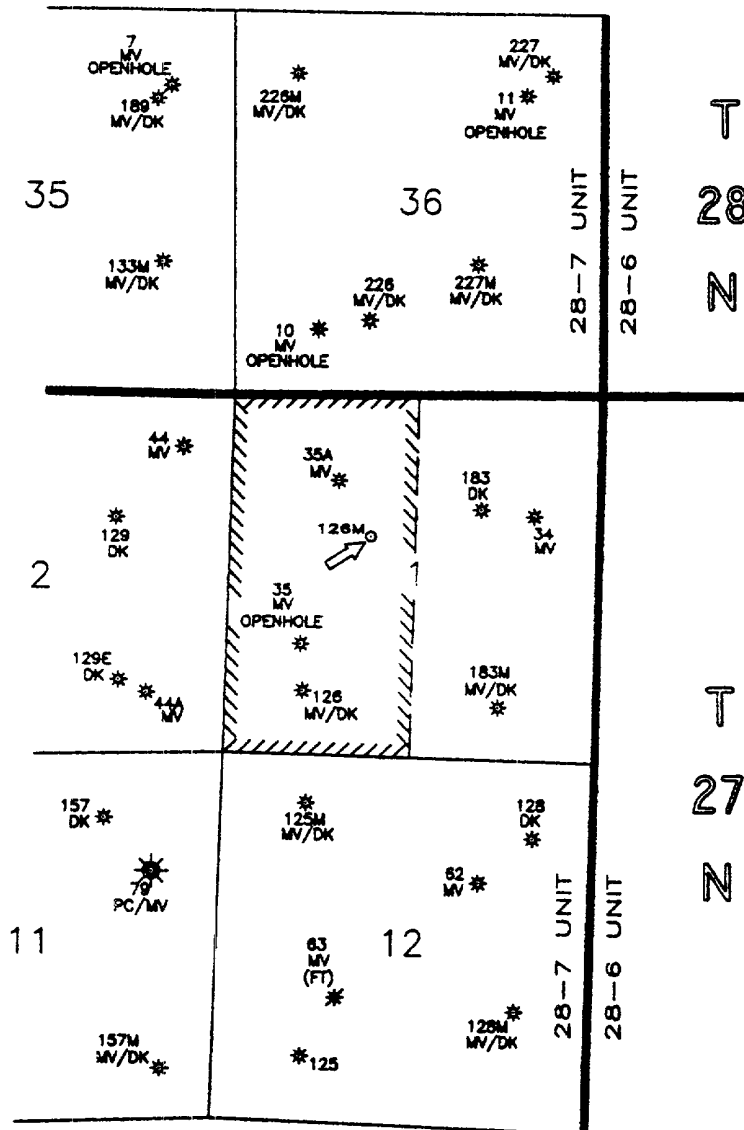

Conoco respectfully requests that a non-standard location order be issued for the above referenced well based on the reasons given in the preceding paragraph. If there are any further questions concerning this application please call me at (915) 686-5798.

Sincerely,

Kay Maddox
