13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

During drilling operations on 6/26/02, Conoco was pumping cement on the 7" intermediate casing. With 20 bbls left in our displacement, we had 30bbls of our 40bbl spacer with celloflake in it plus traces of cement to surface when we lost returns. We finished pumping our job, but did not get cement to surface. We filled the hole, and it would hold a column of fluid. We then ran a temperature survey and found that we had a temperature anomaly at the 9-5/8" surface casing shoe (230') that continued to appear at various places down the hole indicating cement. We notified Jim Lovoto with the BLM and Charlie Perrin with the NMOCD that we had cement at the 9-5/8" surface casing shoe (230') and were told to continue with operations. One condition stated by the NMOCD was that we must conduct a Bradenhead Test 6 mos. after the well is completed to assure that there is no pressure.

14. I hereby certify that the foregoing is true and correct.
