Re: Initial Deliverability Test, San Juan 27-5
Unit 29 (FM), M 13-27-5, Rio Arriba, New Mex.

Dear Mr. Arnold:

Our records show that we submitted two Initial Deliverability Tests for the Mesa Verde zone of the above captioned well. In checking the records, we find that the latter test submitted is the proper test having flow dates of Nov. 7, to Nov. 15, 1958. Its summary should read as follows:

P_c - 1117
Q - 290
P_w - 542
P_d - 559
D - ~~289~~ 286

The test filed with flow dates of Sept. 21, to Oct. 1, 1958, is in error and should be discarded.

Very truly yours,

H. L. Kendrick
Gas Engineer
