Response to Bureau of Land Management letter dated October 1, 1992 operator plans for this well to be used as a water injection well - then a chemical injection well as a component of secondary/tertiary recovery program.

Presently produced water is being injected into well #24 (F-6) to test injectability of that well and as spacer for chemical to follow.

Upon completion of the test of #24 (F-6) operator proposes same test for #19 (H-25).

Accordingly, operator requests "long term shut-in" status for well #19 (H-25).
