February 11, 1960

Well No. 136 is located 1100 ft. from N line and 770 ft. from E line of sec. 23

NE/4 Sec. 23 27N 7E S.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat Dakota Rio Arriba New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6620 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was originally scheduled to be dually completed in the Dakota formation and in the Mesa Verde formation. The Mesa Verde was found to be non-commercial, therefore it will be completed in the Dakota formation only.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
