(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

U. S. Federal "C" Lease

April 24, 1956

Well No. 2 is located 660 ft. from N line and 660 ft. from E line of sec. 31

SW/4 of SW/4	26-N	12-W	
(1/4 Sec. and Sec. No.)	(Twp.)	(Range)	(Meridian)
Undesignated	San Juan		New Mexico
(Field)	(County or Subdivision)		(State or Territory)

The elevation of the ~~bottom floor~~ <sup>ground</sup> above sea level is 6159 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to a sufficient depth to test the Gallup Sand expected at 4650'.

We propose to set 200' of 9-5/8" OD 32.30# J-55 surface casing and cement to the surface.

We propose to drill through the Gallup Sand section to a depth of approximately 5000', and if productive, to set 7" OD casing through the zone. We intend to use scratchers and centralizers and enough cement to cement at least 300' above the top of the pay zone.

We propose to gun perforate the casing and sand oil free the formation during completion.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Sunray Mid-Continent Oil Company
