Farmington, New Mexico*

Attn: Mr. Jack Cole

Dear Sir:

We have received two copies of Federal Notice of Intention to Drill for your #1 Nickson well located 790 feet from the South and 1966 feet from the West lines of Section 35-26N-8W.

This well is a non-standard Pictured Cliffs location as it is nearer than 790 feet to the center line of Section 35, which is the East boundary of this quarter-section. Ballard Pictured Cliffs rules allow the administrative approval of non-standard locations for topographical reasons only and you have not indicated if topography caused your non-standard location. If you will please furnish us with further information we will advise you what procedure should be taken for the approval of the location.

Form C-110 cannot be approved on this well until the non-standard location order has been written.

Yours very truly
