13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Request long term shut-in status. This well is plugged back from the Pictured Cliffs and completed in the Fruitland Coal. Water production has prevented economic production at present gas prices. Area experience shows that the coal must be de-watered for the coal to be commercial. Operator is considering other coal wells to help in the de-watering process. Should these plans be determined to be uneconomic, this well will be plugged.
