(Meridian)

Undesignated

(Field)

San Juan

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 6139 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The open hole & 5 1/2" csg. have been filled with cement up to 5152'. The Gallup formation has previously been successfully squeezed off. An attempt will be made to cut a pull csg. from approximately 3800'. A plug will be set at the top of the cut-off. A second plug will be set from 1200'-1350', opposite the top of the Battered Cliff formation. A third plug will be placed in the bottom of the surface csg.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
