13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Upon pulling the injection tubing from this well, it was found to have a fish in the hole at 3855'. Reports from previous operator indicated that a fish had been left in the hole which they had been unable to recover. Verbal approval was received from Errol Becher (BLM) on 3/24/95 to amend the plugging procedure.

A cement retainer will be set at 3850' and 150 cu. ft. Class B + 4% gel will be pumped below the retainer. This will be the Gallup plug. All other plugs will remain unchanged.

On 3/27/95 the cement retainer was set at 3850'. After pumping 4 bbl. water, communication was established around the retainer. Received verbal approval from Steve Mason to pump adequate cement around the retainer to cover 200' of 7-7/8" hole.

14. I hereby certify that the foregoing is true and correct

Signed

John Alexander
