DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drilled 11-3/4" hole to 215' KB. Ran 5 joints 9-5/8" Armo casing. Landed at 214' KB and cemented with 200 sack regular Portland cement. Displaced to 194' KB with good returns to surface. Waited 24 hours, then tested. Cement held ok.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title **District Superintendent**

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

2. The second step is to define the objectives and goals of the project. This involves determining what you want to achieve and how you will measure success.

3. The third step is to develop a plan of action. This involves identifying the steps that need to be taken to achieve the objectives and goals.

4. The fourth step is to implement the plan. This involves putting the plan into action and monitoring progress.

5. The fifth step is to evaluate the results. This involves assessing the outcomes of the project and determining whether the objectives and goals have been achieved.
