17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Spudded 10:30 PM, 12-5-64.

Drilled 17-1/4" hole to 95' and cemented 85' of 13-3/8" casing at 95' with 100 sacks regular cement with 2% calcium chloride added. Cement circulated.

Drilled 12-1/4" hole to 1121'. Ran deviation test and found hole was off over 70'. Plugged hole back to 427' with 200 sacks of cement with 15% sand and 3% calcium chloride added.

Drilled 7-7/8" hole to 1512' and reamed hole to 12-1/4". Cemented 1497' of 8-5/8" casing at 1511' with 450 sacks liner cement with 12% gel added, followed by 50 sacks of regular cement. Cement circulated. Tested casing with 800 PSI for 30 minutes. Tested okay.

18. I hereby certify that the foregoing is true and correct

SIGNED C. P. Thrmir

CONDITIONS OF APPROVAL, IF ANY:

TITLE _____ DATE _____

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
