(Meridian)

Wildcat

(Field)

San Juan

(County or Subdivision)

New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is 6540 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was originally drilled by Stanolind Oil and Gas Company as the Huerfano Unit #1-2. This well is within the limits of the Huerfano Unit; therefore El Paso Natural Gas will be the operator with name changed to the El Paso Natural Gas Huerfano Unit #1-2.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
