Dettinit
Well No. B-10 is located 660 ft. from N line and 1900 ft. from W line of sec. 28
C-NE, NE Section 28 26N 13W New Mexico P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Disti-Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the ground level surface above sea level is 6256 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Drilled to 5230' KB TD. Conditioned hole and ran 162 joints 5-1/2" OD, 14#, J-55 Casing, equipped with centralizers, scratchers and Baker float equipment. Casing landed at 5229' KB and cemented with 100 bags 1/2" Gel Cement. Displaced to 5207' KB under 1500# psi. Ran Temperature Survey, found top of cement at 4600' KB.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Title **District Superintendent**

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that will be needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and putting them into practice. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any areas that need further attention.
