| 3                  | 10.5                  | 3                   | 10.5   | 10.5   |              |                    |             | It is of the greatest importance to have a complete history of the well. Please state in detail the dates of re-drilling, together with the reason for the work and the results. If there were any changes made in the casing, state unit, and a log reading was "disconnected", or left in the well, give its size and location. If the well has been dynamited, give date, position, and number of shots. If plugs or bridges were put in to test for water, state kind of material used, position, and results of pumping or bailing. |
