Dual Completion  
Basin Dakota Field  
Gallegos Gallup Field

Gentlemen:

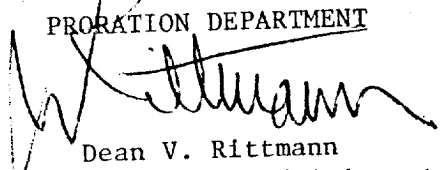

In reference to your letter of March 9, 1978, El Paso is agreeable to Alamo's compressor installation on the Davis Federal #1 Well (dual completion) and the resultant commingling of gas and the allocation of such gas to each well proportionally based on upstream measurement.

However, we have been advised by our Technical Operations personnel that it may be necessary for Alamo to install pulsation equipment in conjunction with their compressor to protect El Paso's measurement meter from error due to pulsation.

If we can be of further assistance, please advise.

Yours very truly,

PRORATION DEPARTMENT
